Amrit Kang

Bengaluru | 9814096767 | amritkang2805@icloud.com | LinkedIn | GitHub | Portfolio

Education

Birla Institute of Technology and Science, Pilani (BITS Pilani) 2025 – 2029
Bachelor of Science in Computer Science *CGPA: 9.27*

Skills

Backend & Systems: Python, Go, FastAPI, Flask, Node.js, AWS (Lambda, DynamoDB, S3, SQS), System Design, Docker
Frontend: React, Next.js, TypeScript, Tailwind CSS, SwiftUI
Data & Other: SQL, MySQL, MongoDB, PostgreSQL, GraphQL, LLM APIs, Git

Experience

Software Development Engineer & Forward Deployed Engineer Intern May 2026 – Present
Grabware

- Managed hosting, deployment, and infrastructure for 15+ production PHP websites, migrating a subset to MERN while preserving live functionality and data integrity
- Coordinated data flow between legacy and new services and designed test plans that caught integration regressions before release

Projects

MERAWARD (GitHub · Live)
Civic-accountability platform for Delhi's 289 municipal wards *AWS, React*

- Built GPS-based ward lookup with voice/photo/text complaint intake and AI-drafted bilingual letters, backed by a public neglect-index dashboard
- Cut API response time to ∼2ms by decoupling Bedrock behind SQS on a serverless AWS stack (Lambda, DynamoDB, S3, SQS+DLQ) via SAM IaC; sub-ms spatial lookups; 254 tests, 100 Lighthouse

ReGit (GitHub · Live) Top 6, Gradient Rush Hackathon
Version-control system for research artifacts (docs, LLM chats, PDFs, codebases) *Python, FastAPI, React*

- Built a content-addressed commit DAG with semantic diff, 3-way prose merge, and real-time CRDT collaborative editing (pycrdt ↔ yjs) with live presence
- Built hybrid BM25 + vector retrieval with time-travel queries and delta-reindexing; fully offline single-process, 120 tests covering CRDT convergence and merge conflicts

Placement Week Scheduler (GitHub)
CP-SAT constraint solver and disruption-aware replanner for campus placement scheduling *Python, OR-Tools, FastAPI, React*

- Scheduled 800 students across 35 companies and 20 rooms (1,123 shortlists), reaching 99.5% interview coverage with zero clashes and 90% room utilization
- Built a validity-based replanner re-solving only the affected slice per disruption, touching 1.4% of appointments and producing a transparent diff; 45 tests

Pocki (GitHub)
Native iOS finance tracker, fully on-device and offline-first *Swift 6, SwiftUI, SwiftData*

- Built a screenshot-to-expense parser working across 5+ UPI apps (GPay, PhonePe, Paytm, BHIM, Amazon Pay) – no manual entry needed
- Zero data leaves the phone; currently at v1.2.0, MIT-licensed, open source

Hackathons

- **Gradient Rush Hackathon** (Top 6): built ReGit, a content-addressed version-control system for research artifacts with CRDT collaborative editing and hybrid BM25 + vector retrieval (Python, FastAPI, React)
- **Replit Hackathon**: built Oratio, a voice-enabled AI debate platform with real-time transcription and an LCR-based judging system
- **ProdX Hackathon** (Top 7 Finalist): built the frontend for iffy.ai (React, TypeScript, Tailwind CSS)
- **Hackarena**: built a 7-agent AI pipeline turning a problem statement into a pitch-ready package (Next.js, FastAPI)
- **RIFT Hackathon**: built LaunderLens, a graph-based fraud detection engine detecting circular fund routing and smurfing at 92% accuracy on 1,000+ transactions (Node.js, Graph Algorithms)

Leadership & Community

Organizer – HackClub Jul 2026 – Present
Selected to lead Bengaluru operations for Sunbeam, a global HackClub initiative spanning 40 cities

Events Lead – Ignite Room Aug 2026 – Present
Plan and execute community events end-to-end: venue, volunteers, speaker/partner liaison
